

MOP

3 & 2 Bucket System

Mop handles & Frame

Exclusive swivel TruCLEAR Mop Frame, made of high-grade stainless steel, can be maneuvered onto floors, walls, ceilings, baseboards and confined areas such as corners or stairs where conventional string mops are notoriously inefficient. Also permits mopping in an "S" motion, collecting solid particles as the technician mops. Low profiled mop frame for easy and efficient cleaning under fixtures or other hard to reach surfaces. TruCLEAR Mop Frame delivers continual surface contact at any angle and is accurately balanced and non-flipping. Changing mop and sponge heads is a clean and easy operation. A quick squeeze releases the frame-locking mechanism, enabling contaminated mop or sponge head to be replaced.

Optional one-piece electro-polished stainless steel handle, Type 304, is 3/4" diameter and 57 1/4" overall. Weighs 2 Lbs. Compatible with gamma, ETO and autoclave sterilization. (Optional handle show in picture.)

TruCLEAR Frame with SS Handle

TruCLEAR Fixed Position Mop Frame

The TruCLEAR Adjustable Handle has been developed to meet the ergonomic and hygienic needs of critical environments. It can be adjusted from 34" to 62" for comfort and those hard-to-reach areas. Made of high quality polyester and composite materials, the TruCLEAR Adjustable Handle is lightweight, durable and chemically resistant.

Autoclavable Polyester Handle
